- **Optional accessories:** Set up Remote RC2573GR

Green Specifications

- **Eco Designed**
- **Safety:** Flame retardant housing

Product highlights

Smart Hotel Mode

Allows configuration of the TV for limited access, ideal for hotel use. Access to the user menu can be blocked, which enables you to specify channel, picture, and sound settings which your guest will be unable to modify. Picture and sound preferences may be selected from presets on the remote, offering guest selection, but never overwriting your defined settings. Switch on and maximum volume can also be specified so the set always turns on and operates at a comfortable volume. Channels can be blanked to prevent access to premium or adult content. Includes a forced power on mode.

USB Cloning

Provides the ability to easily copy all programming and channel programming settings from one TV into other TV sets in less than a minute. The feature ensures uniformity between TV sets and significantly reduces installation time and costs.

SmoovieTV™ prepaid solution

Philips commercial televisions now support SmoovieTV™, a completely new way to offer in-room programming optimized for hotels that traditionally have not been able to charge for such amenities due to their size or budget. Simple to use, SmoovieTV™ requires no expensive head-end equipment or in-room control boxes.

SmartStand

This TV comes with a swivel stand that allows your guests to adjust the TV up to 180 degrees so that they can watch TV from any position in the room. Equipped with built-in security, this stand can be secured to a table or furniture to deter theft.

Five Star Service

Philips offers unmatched commitment to keeping your guest rooms in working order. Our products are so reliable that we offer a two-year advanced exchange warranty. In the event that something does go wrong, we guarantee to ship a replacement set to you, within 72 hours during the first year.

On-shore 24/7 help desk

Your hotel never closes, and neither do we. We offer a 24/7 Help Desk staffed by knowledgeable and friendly personnel to help you with any aspect of your Philips TV install or use.

Energy Star certified

This Philips television meets Energy Star guidelines for reduced power consumption. This saves you money over the life of the television.

Flame retardant housing & RoHS

In addition to being lead-free and RoHS compliant, Philips TVs have a special housing of eco-friendly, non-brominated flame-retardant materials. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to the fire.

Eco-sensitive materials

Philips TVs are designed and produced according to our EcoDesign principles aimed at minimizing overall environmental impact, through lower power consumption, removal of hazardous substances, lower weight, more efficient packaging and better recyclability.

Multiple HDMI inputs

With multiple HDMI, Dual Component, S-VHS, CVBS, and Coax connections, this set will work with any of today's advanced sources.
